

Painting With Light

As we all know, lighting design can make or break a production. One of the most frustrating aspects for a designer is to be able to visualize the look, but be limited by the commonplace equipment at hand. This is where the Lighting department of Pittsburgh Stage can help. Our thorough knowledge of the stage lighting craft allows our team to create intelligent and individual solutions catered to the needs of the customer.

We focus on addressing these needs by utilizing the best products from multiple manufacturers, rather than pushing the "single-manufacturer" mindset. No one-size-fits-all package will ever be pressed by our sales staff. This approach ensures that our customers get the best value along with the optimum solution for their facility. It also allows Pittsburgh Stage Inc. to integrate the newest technologies into an energy-conscious design.

We also provide maintenance and repair on almost any system. The talented technical staff has many years of experience and will provide you with top quality servicing at some of the best prices in the industry. Schedule a no-cost, no-obligation lighting consultation today to see what we can do for you.

What our Customers Are Saying

"Your guys were awesome today... very helpful, informative and caring. ... they did whatever had to be done to get the job done right. You have two great guys."

Simon James
Technical Arts Director
The Bible Chapel

"I would like to commend the work and professionalism of your employees. They were knowledgeable, courteous, quick and diligent workers but yet didn't sacrifice quality, and finally were just great guys to have around."

Spring Check List

As summer approaches this season means very different things for our clients. For some it means the hustle and bustle of the school year is coming to a close and maintenance and repair can begin on the facility. For others it means gearing up for a jam-packed season of concerts. Whether you are closing down main productions or gearing up for a frantic few months, Pittsburgh Stage Inc. has some ideas for you to get the most out of your summer.

- ▶ **Optimize storage space**
Storing set pieces and surplus curtains on the back of the stage quickly reduces available space. Take the downtime during the summer months to break down old set pieces and enlarge your stage space.
- ▶ **Stock up**
Incidentals like lamps and gaff tape, when bought in bulk, can be much less expensive than when bought individually. Contact Pittsburgh Stage about our per-case lamp pricing.
- ▶ **Schedule a safety check**
This simple step ensures all equipment is in proper working order.
- ▶ **Take stock**
When was the last time you saw the production from the audience point of view? Watching the production from the worst seat in the house or the balcony may give a totally different perspective (and maybe some new ideas) on the performance.
